They held a rousing meeting at the beard of labor hall, and discussed the issues of the campaign, as well as means for educating the German citizens of the east on the silver question.

The attendance was large and there was much enthusiasm. Professor Hirsching presided with G. M. Hein as secretary and Morris Sommer was introduced as the first speaker. He outlined the object of the meeting and the work to be done, referring to the radi-

of the east had been misled for years by gold literature, and that now they must be informed as to the other side of the question. German speakers must be sent out to accomplish this, and it could be accomplished by small contributions from the German citizens of Utah.

whole gold standard press of the east, a tone compounded of ferocity and con-tempt toward the silver movement of the west and south, such as would tend to create (if anything could create) the very "new sectionalism," the advent of which this same eastern press so great-

ly deplores.
But I hall the foregoing sentiment from the Weekly with especial delight, and consider it worthy of especial note two reasons

1. Because Harper's Weekly is "a journal of civilization." This is demonstrated by a glance at its title page.

2. Because the sentiment thus expressed is not the mere hypocritical
hedging of an astounded and terrified nud-slinger whose eyes are just being ened to the fact that the "silverites" mean business, and upon whom beginning to dawn that possibly gold standard press has been hurting the cause of the gold standard by a somewhat indiscreet slopping over of high grade billingsgate; but on the contrary, is the sincere expression of a scholarly and dignified organ of con-servative though that has always con-sistently adhered to the policy of coureous argument there suggested. For estance, in the issue next preceding that from which I quoted, the leading editorial of the Weekly was upon the subject of the Chicago convention, and was entitled "The Triumph of Section-alism and Communism." It was a calm, dispassionate and Chesterfieldian dis-

cussion of the issues now dividing the people, worthy of the pen of the lamen-ted Curtis. Its firm, but respectful tone may be seen in the following brief ex-The Democratic party, as it is represented by the convention that met at Chicago, is a party of sectionalism and communism." [The platform] "requests consideration and judgment upon a passionate bellow of ignorance, upon which the controllers of the con-

vention themselves dared not permit the exercise of calm judgment." "Not only were communists and inarchists in control of the convention. anarchists in control of the convention, but the avowed purpose of this modern Democracy is to change the guaranty of the constitution," etc.

The editor tactfully referred to the platform as a "long and dreary welter of socialistic rant, and commonplace."

He said that the success of the Democratic party "will mean national dishonor, the triumph of ignorance, of a sectional and class war on vested rights, upon all that goes to make for the prosperity of the merchant and farmer," etc. "It will mean the plunging of the United States into an age so dark that the imagination shudders at the prospect of such a reign of brutal and besotted ignorance as the civilized world has not known

Consistency is always refreshing, but the consistency displayed in the Harper's Weekly leaders of July 18 and July 25 is of such rare quality that I felt justified in thus calling attention to it. This is more than refreshing—it sexhilirating. Simon Bamberger made a stirring silver speech, saying that the question at issue was one of profound interest to all, rich and poor alike.
